Thank you.

### **How To Print This Document:**

Using these bookmark templates, you can print whatever you like on the front and back. You can choose two items that seem to go together, or you can leave the back blank. It's up to you.

First, select a standard index card stock. (This document will work with either 8.5 x 11 inch or A4 paper.) Set your printer to print heavy stock.

Print as many copies of the front page as necessary.

Following the directions accompanying your printer, print the same number of copies of the reverse side.

*Note:* A laser printer works well for this, but because of the heat involved they do tend to curl the paper. Beware of paper jams. .

If you wish to add color to your pages, you can use any of the bookmark background documents on this site to then print these pages in a color printer.

Cut out the finished bookmarks along the dotted lines. If you are printing on standard North American paper, you can cut the bookmarks apart by cutting every 2.75 inches. If you are using A4 paper, you may need to trim the short sides of each page by approximately 9mm before cutting them apart.
